

Service Engineer – Job Description/Qualifications

Ballast Water Management System (BWMS)

1 Purpose

The purpose of this document is to set qualifications for the Service Engineer. These are basic guidelines and are not necessarily required for employment.

2 Service Engineer (SE) – Qualifications

The SE will be the Choice Ballast/BWMS Maker representative in the shipyard or on the vessel. The SE should have the following qualifications, but are not limited to:

- A valid passport – must be able to travel internationally
- Marine background preferred – shipboard experience a plus
- Good basic mechanical knowledge
- Good basic electrical knowledge – PLC/HMI knowledge a plus
- Able to travel from 2-7 days at a time
- Good shipboard knowledge a plus, as this will allow for quicker training

Full training on BWTS will be given, as well as on the job training until fully competent.
